

SEGUNDO EJERCICIO DE LAS PRUEBAS SELECTIVAS PARA INGRESO EN EL CUERPO SUPERIOR DE TÉCNICOS DE LA ADMINISTRACIÓN DE LA SEGURIDAD SOCIAL.

El ejercicio consistirá en realizar, **un resumen en castellano**, del texto que se les leerá a continuación, disponiendo para ello de **veinte minutos**, así como **una traducción directa**, sin diccionario, durante el tiempo máximo de **cuarenta minutos**.

Texto a leer a los opositores:

THE EUROPEAN PILLAR OF SOCIAL RIGHTS ACTION PLAN

Occupational safety and health standards for a new world of work

Improving occupational safety and health standards is not only essential to protect workers' safety and health but it is also beneficial for labour productivity, employment, and the economy overall. Work-related accidents and illnesses lead to an estimated annual loss of around 3.3% of GDP in the EU. Over the past decade, the European occupational safety and health (OSH) policy framework and rules have contributed to considerably improving working conditions. The incidence rate of fatal accidents at work has fallen by nearly 30%.

An update of the EU's occupational safety and health strategic framework is required due to the rapid technological and societal changes. The pandemic underlined that adequate health and safety measures are indispensable. The acceleration of digitalisation is transforming the very notion of a work environment, the nature and content of work performed, working-time arrangements and workplace relationships. In this context, psychosocial and organisational risk factors may give rise to higher levels of work-related stress, poor mental health as well as ergonomic and safety risks. This is especially challenging for micro enterprises and SMEs.

Ensuring healthy and safe work environments is therefore vital to protect workers, uphold productivity, and to allow for a sustainable economic recovery. The new EU Occupational Safety and Health Strategic Framework will set the key principles and objectives for coordinated action of Member States, social partners, and other stakeholders to improve the health and safety of workers.
